PLACENTA, Volume 4 (1983)

Index

Abramovici, A. *See* Wasserman
Allalouf, D. *See* Wasserman
Alpha-aminoisobutyric acid transfer—
  during normal gestation in guinea pig, 31–39
  for assessing human placental perfusion system for drug transport study, 19–29
Alpha-fetoprotein, effect on placental cell growth in vitro, 79–85
Amnion antigens, as markers of human amniotic epithelial cells, 361–368
Amniotic epithelial cells, human, markers of, 361–368
Amniotic fluid effect on placental cell growth in vitro, 79–85
Antibody—
  monoclonal, in human placental study, 197–205
  transfer mechanism in rat, 175–183
Antigen(s)—
  -bearing decidual cells, Ia, in mouse decidual tissue, 139–148
  histocompatibility, as markers of human amniotic epithelial cells, 361–368
  in human placenta, 197–205
  pregnancy-associated, effect on sheep lymphocyte transformation, 125–131
Artery—
  mesometrial, growth in guinea pigs during pregnancy, 111–123
  uteroplacental, changes related to interstitial trophoblast migration in pregnancy, 397–413
Aspirin, inhibitory effect on PGI_2 synthesis in human placenta, 219–229

Beardmore, J. M. *See* Richards
Bell, S. C. *See* Searle
Berger, P. *See* Tabarelli
β_1-Glycoprotein, pregnancy-specific, charge-shift electrophoresis of, 291–294
Billington, W. D. *See* Searle
Binns, R. M. *See* Staples
Bland, J. M. *See* Pijnenborg
Blank, M. *See* Toder
Bleker, O. P. *See* Hoogland
Blood flow—
  placental, and nutrient analogue transfer during guinea-pig gestation, 31–39
  decrease, uteroplacental, from cadmium toxicity in rat, 149–163
Book reviews, 109–110, 217–218, 435–438
Boyd, P. A., Brown, R. A., Coghill, G. R., Slidders, W. & Stewart, W. J., 255–262
Brain, rat fetal, ontogeny of TRH in, 329–337
Brosens, I. *See* Pijnenborg
Brown, D. *See* Staples
Brown, P. J. *See* Richards
Brown, R. A. *See* Boyd
Burton, G. J. *See* Habashi

Cadmium placental toxicity in rat, 149–163
Calcium—
  -binding vitamin D-dependent protein localization in rat yolk sac, 263–270
  transfer in placenta of intact and thyroparathyroidectomized sheep, 271–277
Campylobacters as placental pathogens, 295–305
Cardiomyogenic differentiation in EC-derived chimaeric placentae, 415–421
Care, A. D. *See* Weatherley
Carstensen, M. H., Leichtweiss, H.-P. & Schröder, H., 165–174
Cassier, P. *See* Delorme
Cattle, campylobacter infection in, 295–305
Challier, J. C. *See* Nandakumaran
Chimaerism, cardiomyogenic differentiation and teratocarcinoma formation in, 415–421
Chimpanzee, placental morphology in, 279–290
Chondroitin sulphate localization in human placenta, 101–107
Chorionic gonadotrophin—
  in human and rat placenta, 379–387
  receptors in human and rat placenta, 389–396
Chorionic vessel lesions, fibrinous vasculosis and, 87–99
Cobalamin accumulation in mouse placenta, 207–215
Coghill, G. R. *See* Boyd
Coid, C. R. & Fox, H., 295–306
Concanavalin-A-induced sheep lymphocyte transformation, effect of pregnancy proteins on, 125–131
Conceptus extracts, influence on sheep lymphocyte transformation in vitro, 125–131
Contractor, S. F. & Stannard, P. J., 19–30
Copius Peereboom-Stegeman, J. H. J. *See* van der Velde
Corrosion casts of fetal vasculature of human term placenta, 41–56

Dancis, J., Kammerman, S., Jansen, V. & Levitz, M., 351–360
Decidual tissue, mouse, Ia-antigen-bearing decidual cells in, 139–148
Delorme, A. C., Cassier, P., Geny, B. & Mathieu, H., 263–270
Demesy Jensen, K. *See* di Sant'Agnese
Dencker, L., 207–216
Dermatan sulphate localization in human placenta, 101–107
di Sant'Agnese, P. A., Demesy Jensen, K., Levin, A. & Miller, R. K., 149–164
Diabetes mellitus, class B, histomorphometry of human placenta in, 1–12
DNA placental content in pig, 369–378
Drug transport study; AIB transport to assess human placental perfusion system, 19–29

Eclampsia, placental phospholipids in, 241–254
Elder, M. G. *See* Jogee
Endometrial hormones in pregnant rat, 379–387
Epidermal growth factor receptors on isolated human placental syncytiotrophoblast plasma membrane, 133–138
Epithelial cells, human amniotic, markers of, 361–368
Espach, A. *See* Moll

Faulk, W. P. *See* Yeh
Fetal brain, rat, ontogeny of TRH in, 329–337
Fetal growth—
  relationship to placental blood flow and nutrient analogue transfer in guinea pig, 31–39
  retardation, human placenta in, 65–77
Fetal vasculature morphology of human term placenta, 41–56
Fibrin in primate placenta, 279–290

Fibrinous vasculosis in human placenta, 87–99
Fox, H. *See* Coid *and* van der Veen

Gardey, C. *See* Nandakumaran
Gatter, K. C., Sunderland, C. A., Skinner, A., Sanders, M. K. & Mason, D. Y., 197–206
Geny, B. *See* Delorme
Glucose transfer in artificially perfused human term placenta, 165–174
Glycosaminoglycans, histochemical localization in human placenta, 101–107
Goldgefter, L. *See* Toder
Goldman, J. A. *See* Wasserman
Gould, S. F., 241–254
Grudzinskas, J. G. *See* Hau *and* Westergaard
Guinea pig—
  mesometrial artery growth during pregnancy, 111–123
  placental blood flow and transfer of nutrient analogues during normal gestation in, 31–39
  trophoblastic growth in, 307–328

Habashi, S., Burton, G. J. & Steven, D. H., 41–56
Haemorrhagic necrosis of rat placenta from cadmium toxicity, 149–163
Hamann, W. *See* Wang
Harley, E. E. *See* Mills
Hartge, R. *See* Wang
Hau, J., Grudzinskas, J. G., Teisner, B. & Svendsen, P., 291–294 *see also* Westergaard
Heap, R. B. *See* Staples
Heparan sulphate localization in human placenta, 101–107
Heparin interaction with pregnancy-associated plasma protein A, 13–18
Hoogland, H. J. & Bleker, O. P., 427–434
Hormones—
  in human and rat placenta, 379–387, 389–396
  protein, influence on sheep lymphocyte transformation in vitro, 125–131
Horseradish peroxidase antibody transfer in rat, 175–183
Hsi, B.-L. *See* Yeh
Human(s)—
  amniotic epithelial cells, markers of, 361–368
  Campylobacter infection in, 295–305
  effect of ouabain on placental transport of rubidium in vitro, 351–359
  fetal vasculature morphology of term placenta, 41–56
  fibrinous vasculosis in placenta, 87–99
  histochemical localization of acid glycosaminoglycans in placenta, 101–107
  idiopathic intrauterine growth retardation in placenta, 65–77
  interaction between pregnancy-associated plasma protein A and heparin, 13–18
  lactate carriers in artificially perfused term placenta, 165–174
  monoamine oxidase content and inhibition in placenta, effect on noradrenaline transfer in vitro, 57–64
  placental histomorphometry in class B diabetes mellitus, 1–12
  placental hormones in, 379–387, 389–396
  placental perfusion system for drug transport study, use of AIB transport to assess, 19–29
  placental phospholipids in pre-term, term and eclamptic pregnancies, 241–254
  placental structure in acute lymphatic leukaemia, 185–195
  placental syncytiotrophoblast mass measurement, 255–262
  placental syncytiotrophoblast plasma membrane, epidermal growth factor receptors on, 133–138
  prostacyclin production by placental cells, 219–229
  ultrastructural study of antigens in placenta, 197–205
  umbilical cord length measurement, 423–426
  uteroplacental arterial changes related to interstitial trophoblast migration in pregnancy, 397–413
Hyaluronic acid localization in human placenta, 101–107
Hydroperoxyarachidonic acid inhibitory effect on PGI_2 synthesis in human placenta, 219–229

Ilgren, E. B., 307–328, 415–422
Immunoelectrophoresis, charge-shift, of placental proteins, 291–294
Immunoglobulin G maternofetal transfer in rat, 175–183
Indomethacin inhibitory effect on PGI_2 synthesis in human placenta, 219–229
Intrauterine growth retardation, human placenta in, 65–77

James, J. *See* van der Velde
Jansen, V. *See* Dancis
Jogee, M., Myatt, L., Moore, P. & Elder, M. G., 219–230
Johnson, P. M. *See* Richards

Kammerman, S. *See* Dancis
King, G. J. *See* Staples
Kofler, R. *See* Tabarelli
Kubeck, M. *See* Shambaugh

Lactate carriers in artificially perfused human term placenta, 165–174
Lactogen—
  human placental, hormonal assessment of, 219–229
  in human and rat placenta, 389–396
  placental, charge-shift electrophoresis of, 291–294
  receptors in human and rat placenta, 389–396
Laliberté, F. *See* Mucchielli
Laliberté, M.-F. *See* Mucchielli
Leichtweiss, H.-P. *See* Carstensen
Leucocyte migration into sheep uterus following uterine progesterone removal, 339–349
Leukaemia, acute lymphatic maternal, placental study in, 185–195
Levin, A. *See* di Sant'Agnese
Levitz, M. *See* Dancis
Lymphocytes, sheep, influence of protein hormones and conceptus extracts on, 125–131

Macrophages, Ia antigen-bearing, in mouse decidual tissue, 139–148
Mason, D. Y. *See* Gatter
Mathieu, H. *See* Delorme
Mesometrial artery growth in guinea pigs during pregnancy, 111–123
Methyl glucose transfer during normal gestation in guinea pig, 31–39
Michael, K., Ward, B. S. & Moore, W. M. O., 369–378
Miller, R. K. *See* di Sant'Agnese
Mills, J. L., Harley, E. E. & Moessinger, A. C., 423–426
Moessinger, A. C. *See* Mills
Moll, W., Espach, A. & Wrobel, K.-H., 111–124
Molloy, C. M. *See* Richards
Monoamine oxidase content and inhibition in human placenta, effect on noradrenaline transfer in vitro, 57–64
Moore, P. *See* Jogee
Moore, W. M. O. *See* Michael
Mouse—
  cardiomyogenic differentiation and teratocarcinoma formation in EC-derived chimaeric placentae, 415–421
  decidual tissue, Ia antigen-bearing decidual cells and macrophages in, 139–148
  effect of α-fetoprotein on placental cell growth in, 79–85
  placental accumulation of vitamin B_{12} in, 207–215
  trophoblast growth in, 307–328
Mucchielli, A., Laliberté, F. & Laliberté, M.-F., 175–184
Myatt, L. *See* Jogee

Nandakumaran, M., Gardey, C., Challier, J. C. & Olive, G., 57–64
Nebel, L. *See* Toder
Neonatal birthweight of infants of smoking mothers, 231–240
Neonatal outcome of infants of diabetic mothers, relationship to placental morphometry, 1–12
Noradrenaline transfer in human placenta in vitro, effect of monoamine oxidase inhibition on, 57–64

Nutrient—
analogue transfer and placental blood flow during guinea-pig gestation, 31–39
supply restriction to fetus causing growth retardation, 65–77

Oedema, placental, fibrinous vasculosis and, 87–99
Olive, G. *See* Nandakumaran
Orang-utan, placental morphology in, 279–290
Ouabain—
effect on rubidium placental transport, 351–359
effects on AIB placental transfer, 19–29
Ovariectomy, leucocyte migration into sheep uterus following, 339–349

Pargyline inhibition of monoamine oxidase, effect on noradrenaline transfer in human placenta in vitro, 57–64
Pathogens, placental, Campylobacters as, 295–305
Phospholipids, placental, in pre-term, term and eclamptic pregnancies, 241–254
Phytohaemagglutinin-induced sheep lymphocyte transformation, effect of pregnancy proteins on, 125–131
Pickard, D. W. *See* Weatherley
Pig placenta, gestational changes in, 369–378
Pijnenborg, R., Bland, J. M., Robertson, W. B. & Brosens, I., 397–414
Placenta—
extrachorialis, in primate placenta, 279–290
blood flow and nutrient analogue transfer during guinea-pig gestation, 31–39
cell growth in vitro, effect of α-fetoprotein on, 79–85
changes during gestation in pig, 369–378
morphology, ultrasonography of, 427–434
perfusion system for drug transport study in humans, use of AIB transport to assess, 19–29
structure, in maternal acute lymphatic leukaemia, 185–195
Pokeweed mitogen-induced sheep lymphocyte transformation, effect of pregnancy proteins on, 125–131
Pre-eclampsia, syncytiotrophoblastic mass measurement in human placenta, 255–262
Pregnancy—
-associated plasma protein A, charge-shift electrophoresis of, 291–294
-associated plasma protein A, interaction with heparin, 13–18
mesometrial artery growth in guinea pigs during, 111–123
-specific β_1-glycoprotein, charge-shift electrophoresis of, 291–294
Progesterone, effects of removal from sheep uterus, 339–349
Prolactin—
in human and rat placenta, 379–387
receptors in human and rat placenta, 389–396
Prostacyclin production by human placental cells, 219–229
Protein—
A, pregnancy-associated plasma, interaction with heparin, 13–18
hormone influence in sheep lymphocyte transformation in vitro, 125–131
placental, charge-shift immunoelectrophoresis of, 291–294
vitamin D-dependent calcium-binding, localization in yolk sac of rat, 263–270

Rat—
antibody transfer mechanism in, 175–183
placental hormones in, 379–387, 389–396
placental toxicity of cadmium in, 149–163
TRH characterization and ontogeny in placenta and fetal brain of, 329–337
trophoblastic growth in, 307–328
vitamin D-dependent calcium-binding protein, localization in yolk sac of, 263–270
Reproductive tract *Campylobacter* infection, 297–302
Richards, R. C., Beardmore, J. M., Brown, P. J., Molloy, C. M. & Johnson, P. M., 133–138
Robertson, W. B. *See* Pijnenborg
Ross, R. *See* Weatherley
Rosso, P. *See* Saintonge
Rubidium, effect of ouabain on placental transport of, 351–359

Saintonge, J. & Rosso, P., 31–40
Salbutamol transfer in human placenta in vitro, effect of monoamine oxidase inhibition on, 57–64
Sanders, M. K. *See* Gatter
Schröder, H. *See* Carstensen
Scott, J. M., 87–100
Searle, R. F., Bell, S. C. & Billington, W. D., 139–148
Shambaugh, G. E. III, Kubek, M. & Wilber, J. F., 329–338
Sheep—
effect of protein hormones and conceptus extracts on lymphocyte transformation in, 125–131
intact and thryoparathyroidectomized, calcium transfer in placenta, 271–277
Campylobacter infection in, 295–305
progesterone and uterine leucocytes in, 340–349
thyroparathyroidectomized, calcium transfer in placenta of, 271–277
Shlesinger, H. *See* Wasserman
Skinner, A. *See* Gatter
Slidders, W. *See* Boyd
Smoking, effects on placental structure, 231–240
Soma, H., 279–290
Stannard, P. J. *See* Contractor
Staples, L. D., Brown, D., Binns, R. M. & Heap, R. B., 125–132
Staples, L. D., Heap, R. B., Wooding, F. B. P. & King, G. J., 339–350
Steven, D. H. *See* Habashi
Stewart, W. J. *See* Boyd
Sunderland, C. A. *See* Gatter
Svendsen, P. *See* Hau
Syncytial role in transplacental metastasis prevention, 185–195
Syncytiotrophoblast—
antigen presence in, 197–205
mass measurement in human placenta, 255–262
plasma membrane, epidermal growth factor receptors on, 133–138

Tabarelli, M., Kofler, R., Berger, P. & Wick, G., 389–396
Tabarelli, M., Kofler, R. & Wick, G., 379–388
Teasdale, F., 1–12
Teisner, B. *See* Hau *and* Westergaard
Teratocarcinoma formation in EC-derived chimaeric placentae, 415–421
Thyroparathyroidectomized sheep, calcium transfer in placenta of, 271–277
Thyrotrophin-releasing hormone characterization and ontogeny in rat placenta and fetal brain, 329–337
Toder, V., Blank, M., Goldgefter, L. & Nebel, L., 79–86
Transferrin receptors as markers of human amniotic epithelial cells, 361–368
Tranylcypromine inhibitory effect of PGI_2 synthesis in human placenta, 219–229
Treffers, P. E. *See* van der Velde
Trophoblast—
antigens as markers of human amniotic epithelial cells, 361–368
effect of cadmium toxicity in rat, 149–163
epidermal growth factor receptor on human placenta, 133–138
growth, control of, 307–328
lactate carriers in human, 165–174
migration, interstitial, related to arterial changes in pregnancy, 397–413

Ultrasonography of placental morphology, 427–434
Umbilical cord length measurement, 423–426
Uteroplacental arterial changes related to interstitial trophoblast migration in pregnancy, 397–413
Uteroplacental blood flow, decreased, from cadmium toxicity in rat, 149–163
Uteroplacental ischaemia causing fetal growth retardation, 65–77

Uterus, sheep, leucocyte migration into, 339–349

van der Veen, F. & Fox, H., 65–78
van der Velde, W. J., Copius Peereboom-Stegeman, J. H. J., Treffers, P. E. & James, J., 231–240
Vasculature—
  changes of placenta from smoking mothers, 231–240
  morphology of human term placenta, 41–56
  uteroplacental, changes related to interstitial trophoblast migration in pregnancy, 397–413
Vitamin B_{12} accumulation in mouse placenta, 207–215
Vitamin D-dependent caclium-binding protein localization in rat yolk sac, 263–270

Wang, T., Hamann, W. & Hartge, R., 185–196
Ward, B. S. *See* Michael
Wasserman, L., Abramovici, A., Shlesinger, H., Goldman, J. A. & Allalouf, D., 101–108
Weatherley, A. J., Ross, R., Pickard, D. W. & Care, A. D., 271–278
Westergaard, J. G., Hau, J., Teisner, B. & Grudzinskas, J. G., 13–18
Wick, G. *See* Tabarelli
Wilber, J. F. *See* Shambaugh
Wooding, F. B. P. *See* Staples
Wrobel, K.-H. *See* Moll

Yeh, C.-J., Hsi, B.-L. & Faulk, W. P., 361–368
Yolk sac—
  antibody transfer in rat, 175–183
  vitamin D-dependent calcium-binding protein in rat, 263–270
